

Abhilash Pandey

Software Engineer | Frontend & AI Integrations

Bangalore, India · abhilashpandey8170@gmail.com · +91-8617030028 · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Engineer with **2.5+ years of professional experience** building scalable web applications, complemented by advanced architectural project experience. Deep expertise in the React ecosystem, component architecture, and high-performance UI/UX. Proficient in **Next.js 15**, **React 19**, and **TypeScript**. Skilled in **AI-assisted development**—leveraging agentic AI systems to prototype, architect, and ship production-grade code significantly faster while acting as lead code reviewer and technical director.

TECHNICAL SKILLS

Frontend	React.js (v18/19), Next.js 15 (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux, Vite
Styling / UI	Tailwind CSS, shadcn/ui, SCSS, Framer Motion, Responsive Design, Dark/Light Themes
Backend / DB	Node.js, Express.js, Serverless API Routes, MongoDB, Firebase, REST APIs, OpenAI API
Tools / DevOps	Git, Webpack, NPM, Vercel, Lighthouse CI, Zod
AI & Orchestration	Agentic AI (Antigravity), Prompt Engineering, AI-Assisted Architecture, Vercel AI SDK
Testing / Quality	Vitest, React Testing Library, Code Reviews, Cross-Browser Compatibility, Core Web Vitals, Accessibility

WORK EXPERIENCE

Freelance Frontend Engineer

Mar 2023 – Present

Independent · Remote

- Designed and deployed **3 production-grade applications** using React 19, Next.js 15, and TypeScript, covering data visualization, AI integrations, and portfolio architecture.
- Directed end-to-end frontend architecture decisions — component design, state management, type safety with Zod, and CI/CD via Vercel and Lighthouse CI.
- Researched and implemented **agentic AI workflows** (Antigravity) for accelerated development, acting as technical director and lead code reviewer.
- Continuously upskilled in modern frontend paradigms: React Server Components, App Router, Serverless API Routes, Framer Motion, and Core Web Vitals optimization.

Frontend Engineer

Jul 2022 – Feb 2023

Miho · Ahmedabad, Gujarat

- Designed reusable React components and styled-components library, **reducing dev time by 40%**.
- Implemented scalable frontend architecture for complex UIs with optimal performance.
- Integrated subscription management, 2FA, and payment gateways to enhance security.
- Managed code quality and technical debt while improving maintainability and testing coverage.

Frontend Developer

Oct 2020 – Oct 2021

Gloqal · San Francisco (Remote)

- Translated design requirements into responsive, user-friendly web interfaces.
- Developed dynamic pages using HTML, CSS, JS; contributed to backend API integration.
- Designed user dashboards and registration flows to improve onboarding experience.

FEATURED PROJECTS

Critical Minerals Intelligence Dashboard ■ [cri-minerals.vercel.app](#)

[React 19](#) · [TypeScript](#) · [Tailwind CSS](#) · [shadcn/ui](#) · [Zod](#) · [Recharts](#) · [React-Leaflet](#)

- Architected a strategic intelligence platform using **React 19** and **TypeScript** for high-performance, interactive data visualizations of global mineral reserves.

- Orchestrated development using agentic AI (Antigravity), directing architecture and serving as primary code reviewer to rapidly translate complex requirements into production-ready features.
- Integrated geospatial mapping (**React-Leaflet**) and quantitative charting (**Recharts**) enabling policy analysts to visually identify supply chain bottlenecks.
- Enforced strict runtime type safety using **Zod** schema validation, eliminating frontend rendering crashes from malformed API data.

Next.js Developer Portfolio ■ [fj-portfolio-zeta.vercel.app](#)

[Next.js 15](#) · [React](#) · [TypeScript](#) · [Tailwind CSS](#) · [shadcn/ui](#) · [Lighthouse CI](#)

- Developed a production-ready full-stack app using **Next.js 15 App Router**, demonstrating advanced proficiency in React Server Components (RSC), SSR, and SSG.
- Leveraged AI-assisted pair programming to rapidly prototype modular components, prioritizing accessibility, rapid hydration, and optimal Core Web Vitals.
- Implemented secure **Serverless API Routes** for dynamic form submissions without dedicated backend infrastructure.
- Configured automated CI workflows with **Lighthouse CI** to consistently enforce SEO, performance, and accessibility standards.

AI-Powered Weather Application ■ [weather-app-three-dusky-12.vercel.app](#)

[React 18](#) · [Vite](#) · [Tailwind CSS](#) · [Framer Motion](#) · [OpenWeather API](#) · [OpenAI API](#)

- Built a dynamic web app integrating **OpenWeather API** via Axios for low-latency real-time weather conditions.
- Integrated **OpenAI API** to generate intelligent, context-aware outfit recommendations based on live meteorological data.
- Crafted fluid UX using **Framer Motion** for seamless transitions, state-driven theming, and geolocation tracking.

EDUCATION

B.Tech, Information Technology

Jul 2021

Bengal College of Engineering and Technology, Durgapur, West Bengal
